**Subject:** Microsoft Settlement

I feel that I must comment on the proposed final judgement (pfj). I feel that there are a tremendous number of flaws with this settlement, but I will limit this complaint to the lack of enforcement capability. I feel that with Microsoft's history of repeatedly and openly defying any and all agreements it makes with the DOJ, it should be essential that in any agreement. The provisions in the pfj are incredibly toothless.

For this as well as numerous other reasons, I would ask that the pfj be rejected, and the doj should properly craft a settlement that does more to EFFECTIVELY remedy the harms inflicted by microsoft in the past and prevent future abuses that are inevitably going to happen.
